

Graphing Ratios from tables.

Wide	2	4	7	8	12
Length	4	8	14	16	24

$$\frac{\text{Wide } 2}{\text{Length } 4} = \frac{2}{4}$$

$$\frac{1 \times 4}{2 \times 4} = \frac{4}{8}$$

$$\frac{1 \times 7}{2 \times 7} = \frac{7}{14}$$

$$\frac{1 \times 8}{2 \times 8} = \frac{8}{16}$$

$$\frac{1 \times 8}{2 \times 8} = \frac{8}{16}$$

$$\frac{1 \times 12}{2 \times 12} = \frac{12}{24}$$

$$(2, 4) (4, 8) (7, 14)$$

$$(8, 16) (12, 24)$$
